

Controlled Open Enrollment

Pursuant to Florida law, students residing in Miami-Dade County, and any other districts in the state of Florida can apply to a school outside their assigned attendance boundary school based on their home residence. Under F.S. 1002.31, students may seek enrollment in any school that has not reached permanent capacity and if such enrollment does not adversely affect the maximum class size restrictions under F.S. 1003.03 or other planning considerations, such as eligibility requirements for specialized programs.

F.S. 1002.33 (10) (e) provides that *a charter school may limit the enrollment process only to target the following populations:*

“Students who meet reasonable academic, artistic, or other eligibility standards established by the charter school and included in the charter school application and charter or, in the case of existing charter schools, standards that are consistent with the school’s mission and purpose. Such standards shall be in accordance with current state law and practice in public schools and may not discriminate against otherwise qualified individuals. A school that limits enrollment for such purposes must place a student on a progress monitoring plan for at least one semester before dismissing such student from the school.”

Miami Arts Charter School admits students based on arts audition results. Enrollment decisions are further influenced by the school’s eligibility standards regarding performance ensemble and fine arts program needs. Audition requirements are available on the school’s website at www.miamiartscharter.net.

Florida law requires that we post our physical student capacity as per the date posted. We emphasize that these figures fluctuate as various students may withdraw or new students enroll.
